

PNK Suguan 1.0.2 — User and Role Guide

PNK Suguan 1.0.2 — release documentation (source: USER-ROLE-GUIDE.md)

Authorization is enforced server-side.

- **Administrator** (`ADMIN``): day-to-day user, teacher, dako, availability, schedule, report, and notification administration; can finalize, publish, and revise finalized schedules.
- **Scheduler/Encoder** (`SCHEDULER``): encodes teachers, dako, availability, assignments, and finalized revisions; cannot finalize, publish, override assignments, manage users, read audit logs, or write notifications.
- **Viewer** (`VIEWER``): read-only access; cannot create or modify records or generate write-protected operations.
- **SUPER_ADMIN** (`SUPER_ADMIN``): exceptional emergency role for authorized published-schedule correction; not granted through the normal user form.

Finalized revision remains permission-controlled. Published correction remains SUPER_ADMIN-only. No role can override LANGUAGE_MISMATCH.
